

Ecoflor MT

A 2-3 mm cement based micro topping

Polished Concrete

Product :	Ecoflor MT
Material:	Polymer Cement
Thickness:	2 - 3 mm
Finish:	Matt or Silk
Substrates:	Concrete ; Screed ; Existing Tiled Floors; Marine Plywood Timber.

- Benefits:
- Resilient Hard Wearing
 - Fire Resistant
 - Seamless
 - Lightweight Ultra Thin
 - Applied to Floors & Walls
 - Solvent Free
 - Easy To Clean
 - Marine Ply Compatible
 - Long Lifespan
 - Looks like Concrete

Ecoflor MT - Concrete Effect Micro Top

Ecoflor MT is a polymer modified cement based water resistant coating designed to be used in multiple thin coat applications both internally and externally to create the look and feel of a concrete surface.

With trowel patination, the system mimics polished concrete and is laid to a thickness of just 2-3mm. It has extraordinary adhesion properties and therefore, with the correct surface preparation, will bond to almost all solid substrates.

Extremely Strong: suitable to bond to most solid surfaces including plywood.

Ultra-Thin: natural stone look with thickness of only 3mm.

About Us

Ecoflor Ltd is a market leader in the installation of specialist resin floor finishes for industrial and commercial applications.

Established in 2004 we have built up a reputation across the UK with an established customer base of major Plc's. Ecoflor are approved installers of systems for the biggest names in resin floor manufacturing.

With our own in-house preparation fleet, we undertake projects from design to handover without splitting responsibility.

From our head office in Cardiff and regional offices in Edinburgh and London, and with an experienced, knowledgeable sales team backed by our manufacturer accredited installation teams, you can be sure your floor is in safe hands.
